STATUS (Sign Traffic and Accident Terminal User System) Database
Metadata: Last Updated July 16, 2010

Data Updates: The Parking Data contained in this database is updated daily, 6 days a week (Monday through Saturday).

Definition of the Data
The Parking Regulations application on the DOT website draws information from the New York City Department of Transportation's sign database, STATUS. STATUS is an operational database that assists the DOT in managing the Agency's inventory of over one million traffic signs in New York City. The database keeps track of the description, location and installation dates for DOT signs. As DOT installs new signs and replaces old or missing signs, this information is entered into STATUS. The present system was built in 1982 and is currently the only comprehensive resource for signs and sign regulations that exists.

Limitations
The information shown on this display was prepared by the New York City Department of Transportation. The information is intended to provide users with parking regulations on signs posted at given locations on the block. The New York City Department of Transportation assumes no responsibility for damages resulting from the use of this data. It is the user's responsibility to adhere to all posted traffic control devices. No warranty or accuracy or completeness is expressed or implied. If you have questions or concerns about the data please contact 311.

DOT will make periodic updates to this application to correct errors reported by the public.
